

The Carbon Chronicle

Authorized as Second Class Mail, Post Office Department, Ottawa

VOLUME 31: NO. 52

ACME, ALBERTA, THURSDAY, JANUARY 29th, 1953

\$2.00 a Year; 5c a Copy

A number of the rinks that competed in the Carbon Bonspiel are curling in Acme this week.

The A.O.I.S. Carbon branch will hold its regular supper meeting in the United Church on Wed., Feb. 4th at 6:15 p.m.

Mrs. Sylvia Walker of Startup, Washington is visiting at the home of her sister, Mrs. John Metzger.

Don't forget that the University Choir is coming to Calgary next week. Don McLeod, Phyllis Schuler and Daun Buyer are among the artists.

Club 21 will be holding its next meeting on Feb. 5th in the form of a skating party. All members are urged to be present and join in the fun.

Walter Martin was home for two weeks while his father was in the hospital, but has again returned to Breton, Alberta to resume his work.

Mr. John Hopley of Winnipeg has installed a new Model V Intertype typesetting machine in this office and, as a result, we expect we'll be able to give better service in the future. We're always pleased to receive news items and that's the only way to build a better paper—with your co-operation.

THE CARBON CHRONICLE
Published every Thursday
at Acme, Alberta

Authorized as Second Class Mail
by the Postal Department
at Ottawa

Mrs. Doug Prowse, Editor
George Wheeler, Publisher

Mrs. Arnold Martin and Mrs. Vivian Sigmond left for North Dakota on January 14.

The Carbon Home and School Association will hold its regular meeting on Tuesday, Feb. 3rd.

The Carbon High School hockey team again met Three Hills in an exciting game at Three Hills on Tuesday, Jan. 27th. The score was 6-2 in favor of Carbon.

Ed. Martin who has been a patient in the Calgary General Hospital for two weeks, returned home on Monday Jan. 19 and is progressing favorably.

The combined groups of the Women's Association of the Carbon United Church held a meeting in the church on Monday, Jan. 26. Mrs. Stewart Hay presided with Mrs. D. Saunders acting as secretary. After discussing problems that concerned the groups jointly, a delicious lunch was served.

The Carbon 4H Wheat Club held their first meeting of the new year on Friday, January 2.

The officers for the ensuing year are:

President.....Morley Buyer
Vice-President.....Lawrence Neher
Sec.-Treas.....Darleen Hecktor
Club Leader.....Edwin Cannings

The advisory Committee includes Ed Foster, Ted Schmidt, Adam Buyer and Leo Ohlhauser.

The next meeting will be held in the Scout Hall on Jan. 30 at 8 p.m.

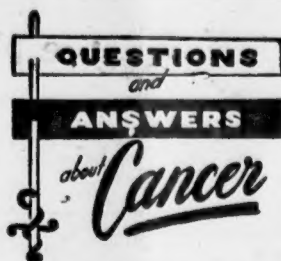

Mr. Harry Lewis and son represented the McColl-Frontenac Co. at a free show in the Scout Hall on Thursday, Jan. 22. Three films were shown, one of special interest was on the discovery of oil in Saudi Arabia, and its industrial development.

Mr. Ralph Pallesen introduced Mr. Lewis who presented the door and special prizes. Ed Ohlhauser, John Metzger and Syd Cannings won door prizes while a whistling tea kettle and ten lbs. of Marfax were won by Mr. G. Eslinger and Mrs. Jake Hoff respectively.

FOR SALE 4 room House—bedroom, large dining room, kitchen, pantry. Immediate possession.—Apply to W. Melton, Carbon.

Misses Geraldine Roth and Amarylis Gramms of College were visiting with their parents over the weekend.

Arnald Martin who has been stationed at Vulcan the past 3 months, has now been moved to Sturgeon Lake, Alberta. He expects to be there for the rest of the winter.

QUESTION: Is cancer "catching" or contagious?

ANSWER:

No. Cancer is neither infectious or contagious. There is no record in medical literature of physicians or nurses getting cancer from their patients.

Know Cancer's Danger Signals—Send for free literature by writing:

Cards of Thanks

To my many friends and neighbors I extend many thanks for the kind letters, cards and flowers sent to me while I was a patient in the Drumheller hospital the past month.

Mrs. Harry Hunt.

I wish to take the opportunity through space given me by the publisher of the Carbon Chronicle, to thank all those who made personal visits and sent cheerful get well cards. Thanks to Mr. and Mrs. Otto Martin and girls, and to the Carbon Baptist Ladies Aid for the beautiful flowers sent to me while I was a patient in the Calgary General hospital. Again, thank you all.

Edward J. Martin

NOTICE

PREPARATION OF ASSESSMENT ROLL 1953 VILLAGE OF CARBON

Notice is hereby given that the assessment of the previous year has been adopted under the provisions of The Assessment Act, and that the assessment roll of the said municipality has been duly prepared and that if any person thinks that any property has been wrongfully assessed, or assessed too high, or too low, or that his name or the name or the name of any other person has been wrongfully entered upon or omitted from the roll, he may at any time prior to the 30th day of April, notify the secretary-treasurer in writing of the particulars and grounds of his complaint.

Dated at Carbon this 31st day of January, 1953.

S. F. TORRANCE,
Secretary-Treasurer.

Dawson No "Ghost Town", Citizens Look To Future

Canadian and U.S. Companies Express Interest In Base Metal Discoveries Near "City"

DAWSON, Y.T.—The words "ghost town" are fighting words here. The 700 normally friendly residents of this once fabulous centre of the Klondike gold rush have various and rather homocidal plans for the writer who recently called the "city" that. Although an aura of the past hangs over the town, its citizens' thoughts are in the present and directed to the future.

Dawson was born in the Klondike gold rush. It sprang from barren tundra to a city of 25,000 within two years of the discovery of gold on the Klondike River.

It became the home of money-hungry adventurers from the world over and for a few short years its name was as famous as any city in the world.

Today if you ask anyone about Dawson, if he knows it at all, he will probably say "ghost town" or,

at least, "dying town". That is, except the citizens, who probably have more civic pride per square inch than any city in North America.

Within the two-square-mile town-site the number of new buildings can be counted on the fingers of one hand. The people live, work and play in the same buildings as the hard-living gold miners of 1900.

Many of the old buildings have been condemned as fire hazards and torn down. Others are sagging, unpainted and empty. Because of the shifting soil, foundations of most buildings, new and old, sink and tilt. The famed Floradora saloon and dance hall, once the liveliest spot in town, now is the Alexandra Hotel and Cafe and in the winter is about as lively as a mortuary.

The plush seats, hardwood floors and velvet curtains of the Auditorium, once the city's pride and joy, are gathering dust. No buyers are willing to pay the \$5,000 purchase price for the building.

The log cabin of Robert Service, the bard of the Yukon, stands sad and neglected on the hill overlooking the community.

Despite the appearance of age, the buildings and homes have running water at \$12.50 a month and electricity at 25 cents a kilowatt. Most residents have telephones and modern cars. A modern fire department serves the town.

Dawson is still supported by gold mining — gold mining by machines that work about eight months of the year. During those eight months the population rises to about 1,200.

Civic pride was hit hard last year when the federal government announced the Yukon's seat of government would be changed from Dawson to Whitehorse, the new centre of the territory's growing population.

"By changing the capital the government is saying there is nothing left up here," one man said, "and that's wrong".

Both United States and Canadian companies have expressed interest in base metal discoveries, including copper and high grade silver, in the immediate area of Dawson. Year-round hard rock mining would put this town back on the map, senior citizens say.

SHORN WOOL OUTPUT

Alberta accounts for 30 per cent. of Canada's shorn wool output, Ontario for 23 per cent. and Quebec 18 per cent.

How To Save Money and Get Fast Cough Relief

Here's an old, tested, home mixture your mother knew . . . still a most dependable remedy for distressing coughs. Fast and effective, children like its pleasant taste.

Make a syrup by stirring two cups of sugar into one cup of water until dissolved . . . no cooking needed (or you can use maple syrup or honey instead). Now pour 2½ ounces of PINEX CONCENTRATE into a 16 ounce bottle, and add the syrup you've made. You'll have 16 ounces of fast acting, pleasant tasting cough medicine, more than you could buy for four times the money, with effective relief for the whole family.

Pinex—a special compound of proven medicinal ingredients—must help you, or money refunded.

PINEX IS EASY TO MIX—
FAST ACTING—EFFECTIVE

—Central Press Canadian.

IN COMMAND OF RECOMMISSIONED HURON—Thirty-nine-year-old Cmdr. Richard C. Chenoweth of Westmount, Que., took command of the tribal class destroyer H.M.C.S. Huron, veteran of both World War II and Korea, when she was recommissioned in Halifax on Nov. 18. A holder of the MBE, Cmdr. Chenoweth joined the Royal Canadian Navy in 1938 and served throughout World War II in North Atlantic convoy work commanding both minesweepers and frigates. Since the end of the war he has served at naval headquarters in Ottawa and Esquimalt, B.C. In 1945, Cmdr. Chenoweth was mentioned in dispatches for outstanding service while senior officer of a minesweeping flotilla.

Funny and Otherwise

"Doc, I want you to check these glasses."

"Okay, take them off. Can you see without them?"

"See! Listen, doc, without my glasses I can't even hear!"

The woman's work that's never done is most likely what she asked her husband to do.

As they propped themselves against the bar, Jones remarked: "I say, old man, when your wife's away, do you have to tell her everything you do?"

Brown smiled sadly. "It's not necessary," he replied. "She tells me that she always gets a more reliable account from the neighbors."

Rejected Suitor: "No, no, Joan; don't give me back my ring. After all, what's five dollars to a man with a broken heart?"

"Look here," said the doctor, "you're only slightly run down. Go and cheer yourself up at one of these snappy revues, with dancing beauties. It will take your mind off business."

"That's just what it won't do," muttered the patient. "I'm an artificial leg manufacturer."

"Nice fellow that, but he always lets somebody else pick up the dinner check."

"Yeah; lifelong impediment in his reach."

A German was the guest of a Frenchman who asked him how they distinguished between an optimist and a pessimist in Germany.

"It is very simple," replied the German. "The optimists are learning English and the pessimists are learning Russian."

"I scribbled a few notes for a speech," said a councillor, "and left them by mistake at the chemist's."

"Ah, and he made them up as eye-wash?"

He was quarrelling with his wife, and not doing any too well. "You didn't have a rag on your back when I married you," he said, acidly.

"No," she retorted, "but I've plenty now."

3014

THRILLS of the ROARIN' GAME

TIPS FOR NOVICES — GOOD FOR VETERANS

Here are a few timely hints for beginners. And they're every bit as timely for some of the oldsters:

1. Don't push the stones with your broom.

2. Don't cross the rink while an opposing player is about to deliver his stone, and stay close to the side with your broom close to your body, so you will not interfere with the view of the players at the hack.

3. Don't touch a moving stone with your broom or body.

4. Don't drop tobacco ashes, matches or cigarette butts on the ice.

5. Wipe your feet before stepping on the ice.

6. Don't stand directly behind an opponent while he is delivering a stone.

7. Don't sweep in the direction a stone is running; sweep crosswise.

8. Don't stand watching the stones on your own side go by; be ready to sweep when told.

9. Don't stand in the house unless you are skipping. Sweepers remain between the hog lines.

10. Don't enter the house when stones are being measured; the mates will attend to that.

11. Don't speak to your opponent when he is set to play. Let him concentrate on his shot.

12. Don't kid a player about a bad shot—he feels bad enough.

13. Don't be too elated over a fluke, and don't crab about a bad shot.

14. Clean your stones before every shot.

15. Keep your eye on the broom, as that is the target you are to aim at.

16. Get well set and balanced at the hack before starting the motion of delivering stone.

To the above tips, we would like to add a paragraph borrowed from Jim Weyman's Analysis of the Art of Curling. "Never forget that when a member of a rink begins to feel that he can skip better, knows more, and plays better than the skip, he should immediately get off the rink, for he is neither of any use to the rink, the skip, nor to himself."

A NEW IDEA

HORN LAKE, Miss.—Mr. and Mrs. Frank Thomas ran into a wrinkle in hitch-hiking. They passed a boy with a sign reading, "Stop at Bill's 50 yards ahead." Up the road was another boy with a sign saying "I'm Bill". They were hitch-hiking back to college.

Baking's Easier, Speedier with Wonderful New Fast Rising Dry Yeast!

CINNAMON BUNS

Measure into large bowl, 1 c. lukewarm water, 2 tps. granulated sugar; stir until sugar is dissolved. Sprinkle with 2 envelopes Fleischmann's Fast Rising Dry Yeast. Let stand 10 min., THEN stir well. Scald 1 c. milk and stir in ½ c. granulated sugar, ¼ tps. salt, 6 tbs. shortening; cool to lukewarm. Add to yeast mixture and stir in 2 well-beaten eggs. Stir in 3 c. once-sifted bread flour; beat until smooth. Work in 3 c. more once-sifted bread flour. Knead until smooth and elastic; place in greased bowl; brush top with melted butter or shortening. Cover and set in warm place, free from draught. Let rise until doubled in bulk. While dough is rising, combine ½ c. brown sugar (lightly pressed down), 3 tps. ground cinnamon, 1 c. washed and dried seedless raisins. Punch down dough and divide into 2 equal portions; form into smooth balls. Roll each piece into an oblong ¼" thick and 16" long; loosen dough. Brush with melted butter or margarine. Sprinkle with raisin mixture. Beginning at a long edge, roll up each piece loosely, like a jelly roll. Cut into 1" slices. Place just touching each other, a cut-side up, in greased 7" round layer-cake pans (or other shallow pans). Grease tops. Cover and let rise until doubled in bulk. Bake in moderate oven, 350°, 20-25 minutes. Serve hot, or reheated.

● No more taking chances with perishable yeast cakes that have lost their leavening power! New Fleischmann's Fast DRY Yeast keeps full strength and active right till the moment you use it. Needs NO refrigeration — keeps safely in your cupboard. Try its marvellous results in your next baking.

INVENTED CENTURIES AGO

Submarines Took a Long Time To Become Seaworthy

By DAVID A. HELLER
(CPC Correspondent)

Way back in annals 323 B.C. when Alexander the Great was blue because he had no more nations to conquer, having the entire civilized world under his thumb, legend has it that he created the world's first submarine by constructing a waterproof glass barrel, climbing inside, and having himself lowered beneath the waves to see what was going on.

Scholars debate whether Alexander really did become submerged in his glass barrel, but one thing is certain—the submarine has a history of many centuries. If you thought it was just another recent gadget, like the A-bomb, designed to give Twentieth Century man a hard time, you couldn't be more wrong.

From the dawn of history and before, man has had two seemingly impossible ambitions—to fly and to travel under water. Both were unrealized for many centuries and both became possible at about the same time. It is no coincidence that they did so, for both had to wait certain basic inventions before an airplane or a submarine became possible.

King James I of England is reputedly one of the earliest submarine fans, for in 1624, when a Dutchman named Cornelis van Dribel invented a successful submarine rowboat (described by contemporary reports as an ordinary rowboat decked over with stout well-greased leather) the king is reliably reported to have been a passenger on an underwater trip down the river Thames.

In 1747, an Englishman named Day built a boat which could be submerged under water down to 30 feet. He once remained under water for more than 24 hours and came up safely. Unfortunately for him, he pressed his luck too far trying to repeat the experiment with a 50-ton sloop in Plymouth harbor. The contraption submerged all right, but it failed to come up and the luckless inventor was drowned.

One of the first successful submarines appeared in the American Revolution. David Bushnell, a graduate of Yale university, designed and built a pear-shaped boat named the Turtle. This bizarre craft was armed with a keg of gunpowder, and the operator was supposed to pedal his way out to the enemy and leave the key, with a time fuse, attached to the hull of a British vessel.

The Turtle submerged and surfaced with ease, and the pedal-operated screw propeller was a great success, but Bushnell never worked out a method of attaching his keg of gunpowder to the copper-sheathed British hulls and nothing came of the experiments.

The inventor of the steamboat, Robert Fulton, worked with submarines for many years. Napoleon lent him 10,000 francs to build a sub for use against the British. In 1800 the French general turned down a successful submarine built by Fulton because it could travel only two knots an hour.

In 1805, the English also rejected it because they feared their enemies might also adopt the submarine with disastrous results to their fleet if they adopted it. After the United States also turned down the invention, Fulton gave up working with

John Holland, "father" of the modern submarine, emerges from cockpit of the first really practical sub in history.—Central Press Canadian.

the submarine, turned his attention to the steamboat and achieved enduring fame with his Clermont, the first successful steamboat.

The first submarine ever to sink a ship was built by the Confederate navy in the U.S. civil war. The craft, a submersible boat named the Hunley, was built specifically for the purpose of destroying the Federal warship blockading the port of Charleston, S.C.

The Hunley sank four times, drowning a total of 40 men before it was finally successful in blowing up the Federal corvette Housatonic with a spar torpedo. The Hunley thus became the first submarine to sink an enemy vessel.

The U.S. Navy acquired its first submarine in 1900 when it accepted the invention of John P. Holland, the "father" of modern undersea craft.

Submarines came into their own in World War I when Germany came perilously close to starving England out of the war with a submarine blockade. It was Germany's unrestricted use of submarine warfare and the sinking of the Lusitania by a U-boat which brought America into the first global conflict.

Oddly enough the United States submarine fleet did not sink a single enemy vessel during World War I. Not until December 16, 1942, did the first sinking of an enemy vessel occur to the credit of the U.S. submarine fleet. On that day, the U.S.S. Swordfish sent the Japanese Atsutan Maru to the bottom.

All told, 63 per cent. of all Jap shipping sunk in the war was sunk by submarines.

Probably nobody is more aware of the role of the submarine in the Pacific war than U.S. Admiral Nimitz.

Here's what he has to say about it: "After Pearl Harbor, for many months submarines were the only naval forces that could penetrate enemy waters and operate offensively against the Japanese navy and enemy shipping."

"Over three-quarters of Japanese merchant tonnage and considerable combatant tonnage fell prey to our constantly expanding submarine fleet. These results were not without loss to ourselves. Forty-eight submarines and 3,500 submariners were lost in battle."

Ducks Go Far

Dr. Stuart Houston recently received reports of another 81 waterfowl, from the approximately five thousand banded at Rousay and Leech Lakes near Yorkton, between 1944 and 1948.

Sixty-four Mallards were shot in 16 states and two provinces, topped by 13 in Arkansas, six each in Louisiana, Nebraska, North Dakota and Saskatchewan, and five each in Tennessee and South Dakota.

Of three Blue-winged Teal heard from, two reached South America! A Juvenile male banded August 29, 1948, was shot November 6 that same year, at "Popayan, Cauca Columbus, S.A.", at an altitude of 1,800 metres. An adult male banded June 19, 1945, was shot in January, 1950, at Lake Loric, near Cartagena, Capital of the Department of Bolivar, Columbia, S.A.—The Blue Jay.

Ice on the Arctic ocean slowly moves clockwise around the North Pole, pushed by prevailing winds and currents set up by the spin of the earth.

Start Feeding Bacon Hogs At Three Weeks

Results of experimental work at the Lacombe Experimental Station, Alta., indicate that feeding bacon hogs should start when the pigs are only three weeks of age. At this stage most sows are physically unable to supply enough milk to keep a large thrifty litter growing properly and extra feed for the little pigs is necessary. This supplementary feed can best be supplied in a creep or in part of the pen accessible to the pigs but cut off from the sow.

The ration at this stage should be of the highest quality. Fibre, such as oat hulls, should be kept to a minimum and water should be available at all times. Rolled wheat or whole hull-less oats or oat groats make good basic creep feed which should be supplemented with a rich protein-mineral mixture supplement.

If skim-milk is fed instead of a supplement it should be sweet and always be of the same quality. There are several good commercial creep feed mixtures or pig starters on the market which contain all the necessary ingredients for young pigs.

If pigs are eating well before weaning there is little set-back when the sow is taken away. Feed changes should be made gradually and when changing from the creep mixture to the growing ration, a week or so after weaning, the two can be mixed and the combination fed for a few days.

The ration fed at Lacombe, says J. G. Stothart, is made up of a basic grain mixture of 50 parts of barley, 30 oats and 20 wheat. A protein mineral supplement is added to this at the rate of 15 per cent. until the pigs reach 115 to 125 pounds and 8 per cent. from then to market weight of 200 pounds. Further experimental work with self-feeding at the Station has shown that the addition of alfalfa meal to the ration of growing pigs improves the carcass quality with no adverse effect on rate of growth. When pigs are self-fed, good performance results if alfalfa meal is added to the above ration at the rate of 10 per cent. of the mixture in both growing and finishing periods.

Water is important in feeding pigs and should be available at all times. Pasture is excellent for prospective breeding stock but experiments have shown that market pigs generally eat more feed on pasture than when they are confined to pens.

PUNISHMENT FITS CRIME

LEICESTER, Mass.—Four teenage boys were caught letting the air out of the tires of 13 parked automobiles. Police Chief William P. Farrell made the boys pump up the tires again—by hand.

GEMS OF THOUGHT

LANGUAGE

A truth is as comfortable in homely language as in fine speech.—Charles Spurgeon.

When the heart speaks, however simple the words, its language is always acceptable to those who have hearts.—Mary Baker Eddy.

In language clearness is everything.—Confucius.

Words are but the signs of ideas.—Samuel Johnson.

Language is not only the vehicle of thought, it is a great and efficient instrument in thinking.—Sir Humphrey Davy.

When the idea is expressed, the language may be ignored.—Chuang-Tsze.

Weekly Tip

ALCOHOL STAINS

Alcohol stains can be removed from furniture. First dampen with lemon oil. Then dip cloth in powdered rotonstone and gently rub it on the stain. Wipe off with more lemon oil. Polish and dry.

On The Side : By E. V. Durling

Cure for Snoring

It is repeatedly stated there is no known cure for snoring. My claim has always been that this statement is not 100 per cent. correct. Depends on what causes the snoring. Not long ago I mentioned a cure for snoring I had heard of, namely, for the snorer to lie on his back and breathe deeply for ten minutes when retiring. Now a feminine subscriber says her husband tried this and it worked. She adds that her husband's snoring had kept her awake for many years. Now he snores not at all and she is enjoying peaceful sleeping.

Windsors Go Rural

I am asked where is the place the Duke and Duchess of Windsor call home. They live in the country not far from Paris. Their house is a converted barn. The Duchess expects to spend the next few months there writing her autobiography.

Hints for Feminine Smokers

The maximum for a feminine smoker should be 20 cigarettes a day. A long holder should be used as it absorbs the nicotine better than a short one. On this all medical experts seem agreed. So, sir, limit your wife to 20 cigarettes a day and give her a long cigarette holder with instructions to always use it. If she rebels, why just call her attention to the "obey" in the marriage ceremony.

Suffers in Silence

If Cole Porter never wrote a song he would still be a millionaire. He inherited \$2 million. Cole never wrote better and gayer songs than in recent years. Yet all the time he has been in pain. Years ago he was seriously injured when thrown from a horse. He had 33 operations and couldn't walk for 15 years. He is now able to walk but still suffers continuous pain.

Privileged Canines

The spaniel was once the most popular dog among royalty. The spaniel of Mary Queen of Scots followed her to the scaffold and after the execution had to be dragged away by guards from the lifeless body of his mistress. In modern times no particular breed has been favored by royalty. King Edward VII had a wire haired terrier named Caesar. In that monarch's funeral procession this dog walked directly behind the gun carriage bearing his master's remains. He took precedence over Kaiser Wilhelm of Germany who marched behind him. It must have been a touching sight to see that little dog in a procession of such magnificence.

But in Private, Please

Jose Ferrer is another believer in standing on your head to stimulate thought. May be something to this. I have noticed people who do it have some good ideas. Next time your wife is stumped for some ideas on how to redecorate the living room, suggest she stand on her head for a few minutes. Try it yourself when some business problem baffles you at the office. Have your secretary stand on her head too. Maybe that will make her come up with a brilliant idea.

What's in a Name

Ever hear of a man named Run Me Shaw? And his brother Run Run Shaw? They are from Singapore and are two of the richest men in the world. Their combined fortune is said to be \$150 million. They own 76 film theatres, 68 in Malaya, the rest in Siam, Hong Kong and Indo-China. They also own many amusement parks and some gambling casinos. Run Me Shaw is quite a sportsman. He has 56 race horses in training.

The Forgotten Women

The forgotten woman of the hotel staff is the room maid. Transient guests rarely leave a tip for the hard working maid who has been such an important factor in the comfort of their stay. Sad to relate, those who leave the maid tipless are usually the guests who give her the most work by the shape they leave the room in.

Strictly Masculine

It is repeatedly stated that Switzerland is the best governed country in the world. The Swiss government is 100 per cent. male controlled. Women are not even permitted to vote in Switzerland. This is a terrific blow to the claim that the female is the superior sex and that if women ran the world it would be a better place to live in.

The usual bidding on this touch-and-go hand from a pairs contest was One Heart by East, double by South and Two Hearts by West, passed round to South who showed great strength by jumping to Three Spades.

North had a close decision and at some tables bid Three No-Trumps, taken back to Four Spades by South. East returned Q Q after winning trick one with K K; when West got in with Q Q, a Diamond return defeated the contract.

In some cases the play took a twist when South led Q 4 at trick three and West played low in case East held a singleton honour. South came back with a Heart ruff, cashed Q K and Q A, and then led Q 3 to Dummy's 10. Two of the East players brightly refused to win with K but were now subjected to an end-play.

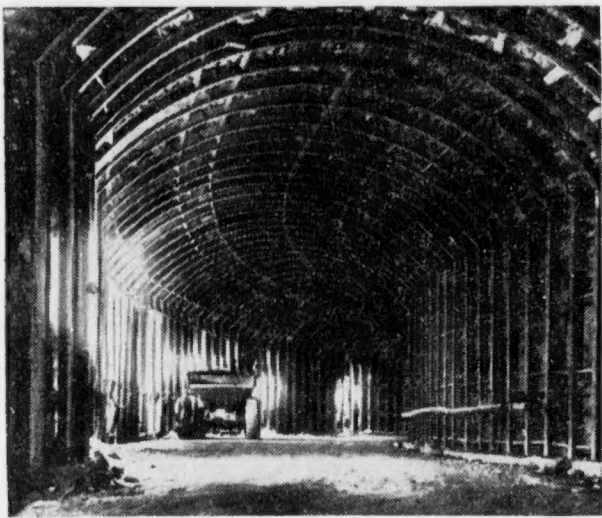

GRANDMOTHER AT 31—Mrs. Wanda Setzer, 31, (left), believed to be the youngest grandmother in the United States is pictured with her daughter, Mrs. Robert Freeland, 15, and her week-old granddaughter, Candace Rae Freeland. Mrs. Setzer, the mother of four children, works occasionally as a model.

POLICEMAN HITS SWEEPSTAKE'S JACKPOT—Perhaps the fact that he has never in his 28 years with police force arrested anyone for possessing sweepstakes tickets—which are illegal in Quebec—helped Lieut. Lucien Charbonneau of the Montreal police traffic division to win \$46,900 in the Quebec Army and Navy and Air Force Veterans' sweepstake. The father of two, seen above with their mom and dad, held a ticket on Summer Rain, which finished first in the November Handicap at Manchester, England. When told of the win, he said: "That's terrific!" and then went on to say: "I won't be buying any big car. Maybe I'll just buy the motorcycle I've been using for years."—Central Press Canadian.

MILITARY NERVE CENTRE IN ATOM WAR—This is the tunneled entrance to the three-storey "underground pentagon" at Camp Ritchie, 65 miles north of Washington, whose existence has been a well-kept secret in the U.S. The project, which cost \$35,000,000, is for use by the U.S. department of defence in the event of an atomic attack. It is protected by heavy steel blast doors, with special provision for ventilation. Emergency power and water supplies and a communication system designed to resist atomic attack.—Central Press Canadian.

WELCOME TO THE FIJI ISLANDS—A Fiji Island welcome is a colorful affair with dancers, traditional ceremony and impressive prayers. This dancer is a cup-bearer in the ceremony, welcoming the new British governor, Sir Ronald Garvey, to the islands.—Central Press Canadian.

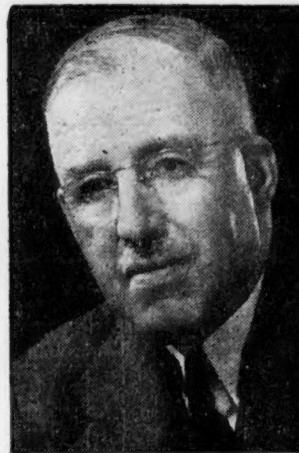

NATO BUSINESS BRINGS RIDGWAY TO LISBON—General Matthew B. Ridgway, supreme commander of all NATO forces in Europe, is seen chatting with president of the Portuguese Republic, General Chaveiro Lopes, (right), following his arrival in Lisbon for a series of conferences of a political and military nature in reference to the NATO. In addition to the many high officials on hand to greet Ridgway, citizens of Lisbon lined the streets to give him a rousing welcome.—Central Press Canadian.

FOURTH BEAR IN 12 YEARS—Mrs. C. W. Sealey and her husband are enthusiastic bear hunters, but so far Mrs. Sealey has collected all the trophies. This is her fourth since 1940. The Sealeys set out from their Dundas, Ont., home, travel to the far north, and while one waits in hiding, the other flushes the bears. In 28 years, Mr. Sealey hasn't hit a single bruin.—Central Press Canadian.

NATIONAL BUSINESS HEAD—Lewis W. Simms, Saint John, N.B., elected President of The Canadian Chamber of Commerce at the organization's recent annual meeting in Toronto, is now making plans for the year ahead during which he will contact Board and Chamber workers, educationists, government leaders and businessmen across Canada. In business life he is president and chairman of the board of T. S. Simms & Company, a brush manufacturing firm which was founded by his father in 1872. Mr. Simms has long been associated with the Chamber of Commerce movement in this country and was one of the founders of the Canadian Chamber, Canada's national business organization. A charter vice-president of the Canadian Chamber, a past president of the Saint John and the Maritimes Board of Trade, Mr. Simms has long believed in businessmen taking a direct and personal interest in national affairs. It has always been his philosophy that Canada, and each of its sections, must make progress and prosper together.

ESCAPES PEN—Bolting from a work detail at Portsmouth penitentiary, Kingston, David Kidd, 25, serving five years on 18 counts of car theft, breaking and entering and forgery, evaded road blocks and search parties that combed the area. It was the first escape from the penitentiary since November of 1950. Kidd was working two blocks from the prison building when he made his escape.—Central Press Canadian.

Canadian Soldiers
Get Confiscated
Cigarettes

★ ★ ★ ★

THEY'RE CALLED "SMUGGLIES"—Thanks to the efforts of the Canadian Customs, R.C.M.P., and other organizations, Canadian soldiers in Korea smoke a popular brand of cigarettes known to them as "smuggies". The smokes are U.S. cigarettes confiscated from smugglers along the Canadian-United States border. "Over one and a half million cigarettes but not one cigar," banters cigar-smoking Welfare Officer Major J. Y. W. Braithwaite, (above), of Toronto, as Sergeant Bill Needs, Sturgeon Falls, Ont., unpacks the large shipment.—Central Press Canadian.

ALL ALONE—A police search has failed to find any relative of this three-year-old girl believed to be Mildred Hall, who has been in hospital in Ottawa since Oct. 8. The girl was brought to the hospital by her father, who gave his address as RR 2, Cornwall, Ont., and said he worked for C.N.R. The father can't be traced, and C.N.R. said it never heard of him. Now the girl is cured and ready to leave hospital—but she has nowhere to go.

MAN AGAINST MUD—Aircraft may change, but the struggle of man against mud remains constant. At the R.C.A.F.'s No. 2 Fighter Wing base at Grostenquin, France, FO. Don McRae of Regina, above left, and Flt. Lt. Paul Fortin, of Montreal and Flin Flon, Man., are shown wrestling with cable reels for the flying control van.

National Hockey League

85 Goals Of Maurice Richard's Scoring Record Of 325 Was Made At Expense Of Chicago Black Hawks—Elmer Lach First Player To Reach Charmed 200-Goal Circle This Season

Richard's 325 Goals

Maurice Richard scored more than his share of winning goals among the 325 he tallied in National Hockey League play. No less than 52 of the 325 goals scored by Richard were game-winners. He scored 15 winners against New York Rangers, 11 against Boston Bruins, 10 against Toronto Maple Leafs, nine against Chicago Black Hawks, and seven against Detroit Red Wings.

Montreal Canadiens' Maurice Richard gets more deadly around the opposition's nets as the game progresses. He enjoys his greatest goal output in the second and third periods. The Rocket notched 116 goals in the second session and 115 in the final figure. He scored 94 in the opening period.

Chicago Black Hawks have been Maurice Richard's "cousins" during his 11-year tenure in the National Hockey League. The N.H.L. goal-scoring record holder accounted for 85 of his 325 goals against Chicago. New York Rangers and Detroit are next to his liking. He scored 63 goals against New York and 61 against the Red Wings. The fiery French Canadian flashed on the red light 59 times behind the Toronto goal. He had his most trouble with Boston, scoring 57 goals against the Bruins.

Rocket Richard isn't a "homer" when it comes to scoring goals. In establishing his N.H.L. goal-scoring record of 325, the scintillating right winger scored 194 times at home and 131 on the road. The 194 goals on Montreal Forum ice is not out of proportion with the 131 away from home when it's taken into consideration that Richard plays five times as many games at home as he does in any other N.H.L. city.

Goalkeeper Harry Lumley of the Toronto Maple Leafs has been Maurice Richard's favorite twine-tender. The Rocket has scored 53 of his 325 goals against husky Harry. Lumley allowed most of these goals when he was playing with Detroit and Chicago, before coming to the Leafs. Chuck Rayner, injured goalie

of the New York Rangers, was another Richard favorite. Hockey's "Mr. Eyebrows" was beaten 42 times by the tempestuous Richard. Turk Broda, retired Toronto goalie, was the victim of 34 Richard goals. Three of the present National League goalkeepers, Jim Henry, Boston; Terry Sawchuk, Detroit; and Al Rollins, Chicago; were beaten by Richard for 20, 13 and nine goals respectively.

Top Goal-Getters

Elmer Lach of Montreal Canadiens, became the first player in the National Hockey League to enter the charmed 200-goal circle this season when he scored his 200th N.H.L. tally on November 8. However, there are four other players in the League who are getting very close to that figure. Ted Lindsay of Detroit with

194 goals on the morning of November 13, and Ted Kennedy of Toronto with 193, should make the 200-goal club before many games have elapsed. On the morning of November 13, Sid Abel, Chicago's playing coach, had 185 tallies and Gaye Stewart of the Rangers had 184. Stewart has yet to score a goal this season.

Herg's Outstanding Performer

Wally Hergesheimer, tiny right winger of the New York Rangers, is one of the outstanding performers in the National Hockey League. The 25-year-old sophomore can finish off a play better than almost anyone in the League. Wally became the first N.H.L. player to score four goals in one game this season. He tallied four times against Chicago on November 12, and missed by a fraction getting a fifth goal. In the Rangers' opener in New York against Boston, he scored all three New York goals to give the Blues a 3-3 draw with the Bruins. There have been four Hat Tricks in the N.H.L. this season and Hergesheimer has accounted for half of them.

Top goal scorer in the N.H.L. on the morning of November 13 with 10 goals, "Hergy" was also one of the loop's leading scorers last season. He scored 26 times in his freshman year and was one of the few players to score three times in one game.

NICE SILVERWARE — Boom Boom Geoffron, Montreal Canadian winger, is shown here with the Calder Memorial Trophy, which he will keep for one year and a souvenir tray which he will keep permanently. They were presented to him by Clarence Campbell, president of the N.H.L., to mark his selection as the outstanding rookie of the 1951-52 season.

Take Care Of Your "Nerves"

If a person is to be able to do his best he must have a normal, natural and healthy nervous system. His nerves will over-react under pressure, such as during an important game, and he will not be able to reach his peak performance.

It seems that a person's attitude toward life is mainly a matter of habit. An attitude is developed because of the things heard, the things read, and the way the people act in a person's immediate circle of family and friends. For example, if you live in an atmosphere of criticism, quick tempers and a lot of hurry, bustle and fuss over unimportant details you will probably have the same attitude. Therefore, it is smart to check up on your attitude and do something about changing it if it is not the right type.

Recently medical and psychology experts have discovered that one of the great causes of tension in people is a critical attitude. Accordingly, make sure you are not the critical type, always pulling people and things apart. If you concentrate on liking people you will find that they will like you, and that many of your differences and troubles will disappear. This will mean, of course, that the tension in your life will be very small, and this in turn will help you develop and keep a sound nervous system.

If you relax and slow down it is not necessary to lose any of your alertness and enthusiasm but merely to develop a more relaxed attitude. Do what you can as hard as you can and let it go at that. Don't waste valuable energy fussing and fretting. This applies to everything you do in your life. Remember—to build and keep a sound, healthy nervous system you must learn how to live in a healthy way, and you cannot live in a healthy way unless you have a good attitude towards life.

How to Develop a Hard Shot

A powerful pair of wrists is an important factor in goal scoring. A hockey player who takes the time to build strong wrists is well on his

way up the goal-scoring ladder. The player with strong wrists can really drive that puck.

Two drills to build wrist strength are:

1. Extend your arms out in front of you at shoulder height. Make as large a circle with both hands as you possibly can. Rotate both ways.

2. Hold arms out to side at shoulder height with palm down. Flap hands up and down as far as possible. Start slowly and increase to all-out pace.

Do these exercises as much as possible.

High Knees Break Tackles

A high knee action is one of the most effective ball carrying tricks in breaking and discouraging would-be tacklers. Here's the idea. When driving into the line or when approaching a tackler in the open field, start those knees driving up and down as if you are trying to hit your chin with your knees. Quite often the tackler is likely to hesitate before he dives into such hard driving knees. If your legs are driving hard in this way your chance of driving his arms away or knocking his tackle off are much better. Don't forget, practice getting those knees up really high.

If you haven't as yet joined Sports College, take this opportunity to do so and take advantage of all the services Sports College has to offer. Membership is free and anyone can join. There are divisions for everyone. To join, send a letter to: Sports College, Box 99, Toronto 1, Ont.

Premiums For Non-Drinkers

LONDON.—British accident insurance companies offered a reduction in premiums to motorists who do not drink. To get the discount they must join the "Abstaining Motorists Association".

The necklace is believed to be the oldest form of jewelry. 3014

Answer To Last Week's Puzzle

—By Al Vermeer

Oil Reserves Are Of Vital Concern To Canada

What Figure That Will Be Ultimately Reached Is Anybody's Guess — Forecasts Run From Five To Twenty Billion Barrels

(By Forbes Rhude, Canadian Press Business Editor)

Before oil was discovered at Leduc, near Edmonton, in early 1947 Canada's total oil reserves were estimated at 72,000,000 barrels. What figure Canadian reserves may ultimately reach is anybody's guess. Forecasts run from 5,000,000,000 to 20,000,000,000 barrels. These are vital figures to Canadians, for each Canadian, one way or another, uses an average of 11 barrels of oil a year—for gasoline, furnace fuel, face cream, or any one of the thousands of uses for oil products.

By oil reserves is meant the estimate of the amount of oil which can ultimately be brought up from known fields.

Comparisons of Canadian reserves tend to be made with Texas. Texas has half the proved reserves of the United States, which total nearly 32,000,000,000 barrels, and about 10 times the proved reserves of Western Canada.

But Western Canada has 770,000 square miles of area geologically favorable to the existence of oil, running from the United States border to the Arctic Ocean, and this is three times the favorable area of Texas.

So, if the Texas experience is repeated, Canada has a lot of oil to uncover.

Statistics about oil are heavy reading, but the reality behind them has some of the quality of the magician's wand.

It's like dreaming that you have found a fortune in an old trunk in the basement, and then awakening to find that the fortune is really there.

That's what happened to Canada. She dreamed for years that she might have oil under ground and then, in 1947 and the months following, found she actually had it.

The weighty oil figures didn't exist less than six years ago. They represent new-found wealth which has not only been part of post-war prosperity but a large factor in creating it and in sending a stream of money across Canada.

Here are some of the figures:

Since 1946 more than \$1,000,000,000 has been spent developing the Canadian oil industry — exploration, transportation facilities such as pipelines, refineries and so on.

Meantime, to the end of 1951, oil valued at \$329,000,000 was produced.

From 1946 to the end of 1951, \$1,200,000,000 was raised for the Canadian oil industry. Of this, the industry in Canada put up \$300,000,000; the public, chiefly Canadian and American, subscribed \$560,000,000 through stock and bond issues, and the United States oil industry made a direct investment in Canada of \$330,000,000.

In 1946, \$12,000,000 was spent in oil exploration. In 1952, \$300,000,000 is being spent.

In December, 1946, 393 wells were producing. In December this year 4,200 will be producing or capable of producing.

In 1946, Canadian refineries could handle 245,865 barrels a day. Today they can handle more than 400,000 barrels. A barrel contains 35 Imperial gallons, or 42 U.S. gallons.

In 1946, Canada used 221,935 barrels of oil a day and produced only 20,841 barrels or nine per cent. of her needs. She bought the rest from other countries.

This year, Canada will use about 455,000 barrels a day and will produce about 169,000 barrels or 37 per cent. of her needs. Actually, she

could produce nearly 70 per cent. of her needs from present wells.

Production is held down because so far it is more economic to import oil into the most eastern parts of Canada and into British Columbia than to pay transportation costs from Alberta.

About 96 per cent. of Canada's oil production comes from Alberta. The Alberta fields best known to the public are Leduc and Redwater, in the Edmonton area, and Turner Valley, south of Calgary.

But now such names as Wizard Lake and Bonnie Glen are catching on, and with reason.

For, whereas Wizard Lake produced only 190,495 barrels in all of 1951, it produced 925,730 barrels in the first eight months of this year. Bonnie Glen, which produced nothing last year, yielded 253,239 barrels in eight months of 1952.

So it goes down a long list of increases as oil is discovered and brought into production over a widening area.

Here are some figures on the present leaders:

In 1951, Redwater, with an estimated reserve of 760,000,000 barrels, produced 23,177,607 barrels; Leduc, with an estimated reserve of 275,000,000 barrels, produced 13,743,118 barrels; Turner Valley, Canada's first big field which has been producing since 1936, brought up 2,952,307 barrels.

Turner's production has been declining since 1942, and of its lifetime reserve of 125,000,000 barrels, only about 225,000,000 barrels are left in the ground.

ODDITIES In The News

A crow at Ohio State University may have something to talk about when he finishes a course in speech. Called Maxilian, the crow is the subject of experiment by Dr. Philburn Ratoosh, assistant professor of psychology, to see if the bird can learn to read and comprehend. After six months, the bird has learned to choose a card marked "yes" or "no" in answer to a question and is expected to progress further.

A year ago Minnie Murdock, 58, of Cedar Rapids, Ia., was struck by a car while walking across a residential street. Recently she started across the same intersection. She again was struck by a car. The same leg again was broken.

Alf Robinson, 36, of Sydney, Australia, lost his speech in a motor accident 10 years ago. Opening a case bound with wire, recently, he aimed a hatchet at the wire but hit the little finger on his left hand. "Oh, my finger," he shouted. "I've chopped off my finger." Then, in astonishment at the sound of his own voice, he shouted again: "I can talk again! I can talk again!"

Smile Of The Week

"By the way, friend, you should pull the shades down when you kiss your wife. The Mrs. and I saw you as we drove by your house last night."

"The joke's on you, pal. I wasn't even home last night."

Eat Right—Live Right—Feel Right

APPETIZING RECIPES

When the festive season begins, you'll be glad to have some easy recipes for quick cookies. These Lemon Squares, Christmas Cookies, and Date Nut Bars are all made from a base of cake mix in just a few minutes—handy during the Christmas season—and any time when you need to refill the cookie jar in a hurry.

Christmas Cookies

One half cup butter, at room temperature, (if vegetable shortening is substituted, sprinkle 1 tsp. water over mixture after cake mix has been added), ¼ tsp. vanilla or almond extract, 1 egg yolk, unbeaten, 1 package instant white cake mix.

Cream butter until soft. Add flavoring and egg yolk and blend well. Then add cake mix and work together with spoon, pastry blender, or fingers until dough is

formed. (Dough will be firm like pastry). With rolling pin, roll dough ¼ inch thick and cut out Christmas shapes with floured cookie cutters or cardboard patterns. Bake on ungreased cookie sheet in moderate oven (375 degrees F.) 8 minutes or until done. Cool cookies a few minutes before removing from cookie sheet. Makes 5 to 6 dozen cookies, depending on size. Decorate with frosting, colored sugar, candied cherries, colored candies to make appropriate design.

Urges Householders To Instruct Baby-Sitters In Case Of Fire

Saskatchewan Provincial Fire Commissioner R. A. W. Switzer urges householders to make sure that baby-sitters they hire are warned what to do in case of a fire. Mr. Switzer said that many fires can become fatal when a baby-sitter is unfamiliar with exits from the house. The fire commissioner noted that householders, before they turn over the care of their children to a baby-sitter, should brief the baby-sitter before leaving.

Pointing to last year's statistics, Mr. Switzer noted that three children were burned to death when they were left alone in the house. He also stated that three other children were burned to death during Fire Prevention Week this year while the mother was visiting a neighbor.

In another fire last April, a baby-sitter left the premises and a one-year-old boy started a blaze by playing with matches and was burned to death.

First of all, it should be impressed upon the baby-sitter that the first and most important thing to do in case of a serious fire in the home is to get the children out of the house.

In this regard, the baby-sitter should be familiar with all exits from the house so that she can get the children out of danger by the safest and most direct route. Mr. Switzer reminded that in case of a serious fire the baby-sitter should not take time to dress the children, but is advised to grab a blanket or something to wrap up the child.

After the baby-sitter has the children free from danger, the fire commissioner advised that the fire department should be called immediately from a neighbor's house or street fire alarm box.

The fire commissioner added that baby-sitters should also be familiar with the operation of the heating system in the home. If the house is heated by oil, and the baby-sitter notices something wrong, she should immediately turn down the thermostat, or, if it is an ordinary floor space heater, the switch governing the flow of oil into the burner should be turned off.

Once this is done, the baby-sitter should call the fire department and the owners of the house immediately.

If the baby-sitter smells smoke, Mr. Switzer warned, she should call the fire department and move the children close to the front door. The baby-sitter should be warned that smoldering fires in concealed places may suddenly break out with almost explosive force.

In case of a gas leak in homes where gas is used for heating pur-

poses, the baby-sitter should get the children out of the house immediately and call the fire department from a nearby house.

As a final warning, Mr. Switzer warned householders to always leave a telephone number where they can be contacted in case of an emergency, and to always make sure the baby-sitter knows where the telephone is so the fire department can be called in case of a fire.

Quick Canadian Quiz

1. Before World War II we imported almost two-thirds of the steel we used. How much do we import today?
2. Name Canada's most easterly point.
3. This year will Canadians pay more to support federal old age pensions or family allowances?
4. How do the boundaries of Alberta and Saskatchewan differ from those of the other eight provinces?
5. What textile fabric do Canadians use most of?

VIRGIL

OUR COMPLETE SHORT STORY —

PRIVATE LIFE

By RUSSELL WILSEY

"GOOD evening, Captain Burnett," the girl in the deck chair called out. "Are we on our course?"

The tall, striking ship's officer moved down the narrow steel steps and crossed the deck. He bowed slightly, grinning, and then dropped into the chair beside her.

"Thanks for the promotion, June," he said, "but you'd better watch that 'Captain' Burnett. I'm apt to be seized for mutiny."

"Okay, Jim," the girl answered, reaching over to touch his hand lightly.

"Well, what are we reading today?" he asked, nodding at the book in the girl's lap. "Oh, Viorden's 'White Waves'. Good, isn't it?"

"He's a marvelous writer," the girl answered enthusiastically, fondling the book and looking out to the vast stretch of sea. "Every once in a while I'd check his descriptions of the sea with the real thing out there. It's uncanny, the knack he had for giving you the exact feeling of a thing."

"That was his main forte," the young man answered, "description. Especially the sea. There's a story, as strange as any one he ever wrote, behind his ability at creating pictures with words."

The girl looked up at him. "That's funny, Jim, I can't remember ever having read a single line about the man himself."

"That's not surprising," the man answered with a gentle smile. "His personal life was always more a matter of speculation than actual fact. Viorden wasn't even his real name, you know. He kept his whole life a secret from his public, although parts of it appear in his novels."

Taking the girl's hand firmly in his, the man settled back in his chair and looked out to the sea.

"Viorden was always rather shy, although he wasn't a sissy by any means. His father died when he was young, and he went to sea at fifteen to support his elderly mother. He got his education in a hard school. Like a great many sailors, he began to read during the long stretches between watch. By the time he was twenty, he decided he wanted to be a writer more than anything else in the world."

"He 'beached' himself, got a land-lubber's job, and went to school nights to study. By then his mother had passed away, and he had only himself to take care of. One of his professors took an interest in him and invited Viorden to his house for dinner and private consultation on Viorden's writing. There the young, socially awkward Viorden met the professor's daughter."

"She was slim and graceful, and her hair was a pale blonde. Her eyes were an incredible blue. When the professor revealed to Viorden, for he didn't realize it himself, that the girl's eyes were as useless as they were beautiful, he couldn't believe it. But it was true, she had been stone blind from birth."

The young man fell silent, and for several minutes the couple were held suspended in a silent world, disturbed only by the muffled trembling of the ship's motors and the whisper of the sea.

"This poor girl had shunned life completely," he went on, "and knew only the world of music. Her father had managed, despite his small salary, to amass for her a huge collection of phonograph records. Through her Viorden discovered music, and in turn he led her out into the world."

"First it was only short trips to a park nearby. There the young writer described everything he saw for the girl. He tried to bring the green of young leaves and grass to her. He told her of the birds, the slow, pompous pigeons, the sluttering, scattered-brained sparrows, the scolding blue-jay, and all the others. He described the people, the mothers and yelling youngsters."

"Then he took her farther and farther afield. He brought her to the docks and outlined the great ships that he knew so well. Everywhere they went he found something to tell her about. He tried to find just the right word, with just the right shade of meaning and content, for everything. And, to open her world even wider, he made up stories about the people they found on park benches, or walking in the streets, or sunning themselves at the beach."

"It became so natural that the young Viorden did it in front of the girl's father, and the professor encouraged him to write these simple yet imaginative stories down. Almost at once they were successful with editors. Viorden was able to quit his job and devote all his time to writing and the girl. With his new wealth he was able to buy a sailboat, and he took the girl for long sails in the bays and channels, and finally out at sea. On the small craft, with everything in orderly arrangement and close at hand, the girl learned to move and handle the sails better than most normally gifted people could."

"Viorden's first novel was a terrific success, and he really came into his own. But he kept the acclaiming world at a distance. He married the girl and they moved to a small house near the sea. They didn't hibernate. Viorden had many friends, who dropped in on the couple frequently."

"They lived happily for many years. Viorden completed six more novels, and the couple had a child, a son. But one day Viorden and his beautiful wife climbed into their sailboat, put out to sea, and were never seen nor heard from again. A sudden storm engulfed them. But, at that, I think they had more happiness than most."

Again the couple were quiet. Around them the ocean and sky pressed close with the mantle of late evening.

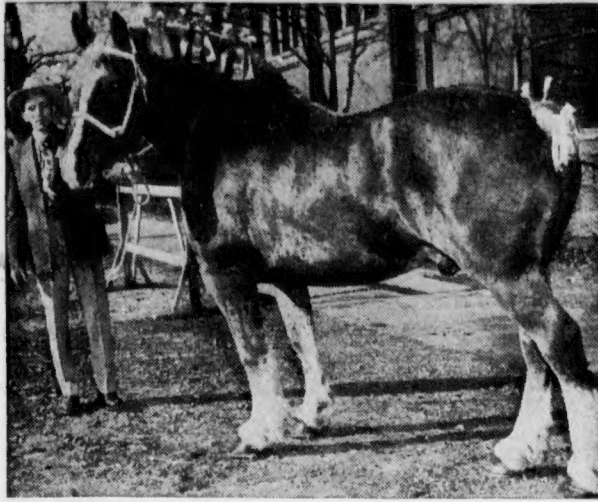

In a low voice the girl asked, "How did you learn all this, Jim?"

"Viorden's real name," he answered, "was Burnett."

Another Blue Ribbon For Alberta

Winner of the Canadian Belgian special, reserve open Belgian championship, and a second in the All Classes open is this five-year-old Belgian horse owned by Hon. D. A. Ure, minister of agriculture for Alberta. Mr. Ure is seen with his horse at the Royal Agricultural Winter Fair, Toronto.—Central Press Canadian.

Vibration Treatment On Winter Wheat Seed Being Tried

SASKATOON.—Treatment of winter wheat seed by vibration method is being tried at the University of Saskatchewan here in an effort to speed vernalization—freshen the wheat for spring planting. Dr. B. C. Jenkins of the field husbandry department is using supersonic waves on the wheat, as did George Obelen-ski recently on barley seeds at the University of Alberta. This speeds germination and growth.

B.C. To Push Highway Programs

VICTORIA.—Every advantage will be taken of favorable weather to push forward with one of the most extensive programs of public works ever attempted during winter time in B.C., it was revealed by Neil N. McCallum, of the public works department.

A tremendous amount of work is under way and will be advanced as far as possible. Other projects will be finished next spring.

Men At B.C. Air Base Always Alert

COMOX, B.C. — The men of the R.C.A.F. stationed at war alert at the booming air base at Comox have two words drummed into them daily — "Pearl Harbor".

The lessons the Americans learned by December, 1941, have been taken up by the men of No. 407 Maritime Anti-Sub Squadron based at the Vancouver Island station.

Every day, Lancaster bombers roar out over the quiet little town of Courtenay, situated nearby, and head for the open sea, fully armed.

Their job is to protect the wide-open coastline, hunting for enemy bombers and scanning the seas below for enemy subs. And it's just not a mock form of training. The men take it seriously.

"We impress on our men constantly the possibility of a Pearl Harbor type of attack," said Group Captain G. S. Austin, the commanding officer. Austin is in charge of the fastest-growing air base in Canada and the largest operational station west of the Great Lakes.

The bombers spotted about the fields are not splashed with camouflage; neither do the buildings and installations wear the grey-and-green paint of war.

"What's the use," said Austin. "An enemy wouldn't have any trouble finding us with radar, and anyway, whatever planes which come over would be carrying bombs for the cities."

That is the changing face of the push-button war.

Plans to build up the station, left to rot since the end of the war, are going ahead full blast.

Next summer, Austin hopes to have the all-weather twin jet CF-100 fighter based on the station. They would be sent up to knock down any foreign bombers in event of war.

The west coast now is protected against a bomber raid with only outdated piston-driven Mustangs of the reserve stations ready for action.

A new concrete hangar—only one of its kind in Canada—is being put up and in blueprint stage is the largest hangar ever built in Canada and big enough to hold the largest bombers in the world.

Concrete runways are being extended and the R.C.A.F. now owns 25 square miles in the immediate area surrounding the station to be used for future expansion.

Side by side with the growth of the station is the growth of the little town where married personnel live. In it are modern shops and stores, a hospital, water system, fire department and jail.

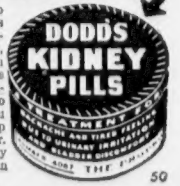

There are 150 houses built or being put up to look after the 1,500 airmen and their dependents and 50 more are to be built later.

Do You Know That...

The average adult has about 20 square feet of skin, which weighs from seven to 10 pounds.

YOU CAN DEPEND ON

When kidneys fail to remove excess acids and wastes, backache, tired feeling, disturbed rest often follow. DODD'S Kidney Pills stimulate kidneys to normal duty. You feel better—sleep better, work better. Get Dodd's at any drug store. You can depend on Dodd's.

Itch..Itch...I Was Nearly Crazy

Very first use of soothing, cooling liquid D. D. D. Prescription positively relieves raw red itch—caused by eczema, rash, scalp irritation, chafing—other itchy troubles. Greaseless, stainless. 43c trial bottle must satisfy or money back. Don't suffer. Ask your druggist for D. D. D. PRESCRIPTION

Former Carbon Residents Foil Burglar

The following item taken from the Calgary Herald and concerning former Carbon residents.

An intruder who entered 1006 5th Ave. W. at 8:10 p.m. Saturday evening thought the house was empty. Fortunately, Tom Heath and his brother Reginald happened to be in the basement. They just missed catching the culprit after a chase through

QUESTION: Is Cancer a disease of old people?

ANSWER:

While cancer occurs most frequently in the older age group, no age is free from it. It may occasionally occur in very small children.

TEN COMMANDMENTS OF CURLING

First—Thou shalt not allow the game of curling to come before thy duty.

Second—When thou playest, play with all thy heart, but when the game is over, let it not claim all thy waking thoughts nor all thy dreams. There is more in life than play.

Third—Thou shalt not make jests that wound nor raise thy voice wrathfully. As thou wouldst control thy rock, control thyself.

Fourth—In thy delight in the game, thou shalt not neglect thy home, thy church, thy business or thy community.

Fifth—Thou shalt honor thy opponent, likewise thy fellow members of thy rink, even though they may be but beginners, that the game may go merrily and be a source of pleasure to all.

Sixth—Thou shalt win with humility.

Seventh—Thou shalt lose with cheerful countenance.

Eighth—Thou shalt not bear the streets.

They heard the back door open and someone walking on tip-toe through the kitchen. Investigating, they noticed a light shining in a back bedroom.

They heard another door from the room open then chased a slim young man in a dark coat down 5th Ave. through two yards, along 6th Ave. and then lost him. No articles were stolen.

false witness against the ice, nor him that made the ice, neither thy fellow curlers, nor thy luck, but shall bear thy full share of responsibility when thine opponents are too much for thee.

Ninth—When thou hast spent so much upon thy game, grieve not if thy wife ask of thee a new gown, or thy son a pair of shoes, or thy church a shkel, which some pronounce "nickel".

Tenth—Thou shalt not covet thy neighbor's rocks, nor his broom, nor his rink, nor his skill, nor his winning streak, but shalt be thankful for that which is thine own.

Once standard equipment in a cotton mill, the old spinning "mule" has long since gone by the board.

Dominion Textile's manufacturing equipment is now among the most modern in the world. Machinery bought by our 7,239 shareholders (94.7 of them Canadians) help us to turn out top quality goods and provide jobs for the 12,500 Canadians working in our plants.

But equipment improvements, such as replacing the mule, aren't everything. We have our troubles trying to compete with the products of other countries which pay lower wages. In Japan and India, for instance, wages run about 15 cents an hour, while we pay well over a dollar an hour.

Are You familiar with City Traffic Laws?

A HELPFUL HINT ON CITY DRIVING

DO NOT BLOCK INTERSECTION

STOP WHEN TRAFFIC OBSTRUCTED

Do not enter an intersection or a marked crosswalk unless there is sufficient space on the other side of the intersection or crosswalk to accommodate your vehicle without obstructing the passage of other vehicles on the opposing street, even though a traffic control signal indicates that you are to proceed. In other words, do not block an intersection or crosswalk with your vehicle.

Be Careful the life you save may be your own.
